

Final Product Change Notification

201811008F01

Issue Date: 10-Apr-2019

Effective Date: 23-Jul-2019

Dear *Patricio Gomez Bello*,

Here's your personalized quality information concerning products Premier Farnell PLC purchased from Nexperia.

For detailed information we invite you to [view this notification online](#)

Release of 8 inch wafer diameter for general-purpose bipolar transistors

Details of this Change

Release of 8 inch wafer diameter for general-purpose bipolar transistors.

Old products: Production using 6 inch wafer diameter

Changed products: Production using 6 and 8 inch wafer diameter

In addition the thickness of the top side metallization for parts of the affected bipolar transistors will be adapted from 1.4 to 1.5µm for standardization reasons. Selected types have a change in die pitch size along with release of 8 inch wafer diameter. Some product types in SOT323 package have a release of lead frame design version SOT323 R1. Please refer to the Self Qualification Report for details and list of affected product types.

Production on 8 inch wafer diameter implies the use of the respective 8 inch wafer process technology.

Why do we Implement this Change

To increase flexibility and volume ramp-up.

Identification of Affected Products

The 8 inch products can be identified by a marker on the die surface.
Changed products can be identified by date code after implementation.

Product Availability

Sample Information

Samples are available upon request
Latest sample request date for PCN samples is 10-May-2019.

Production

Planned first shipment 01-Aug-2019

Impact

No impact to the products' functionality anticipated.

Data Sheet Revision

No impact to existing datasheet

Disposition of Old Products

Existing inventory will be shipped until depleted.
Supply using 6 inch wafer will be continued in parallel to 8 inch wafer production.
