

Product Announcement

WAGO Discontinues 773 Series PUSHWIRE® Splicing Connectors

May 6, 2025— WAGO has officially announced the discontinuation of its 773 Series PUSHWIRE® Splicing Connectors. This strategic decision is due to the response to increased tariffs affecting the series and the immediate availability of the new and improved **2773 Series PUSHWIRE® Splicing Connectors**, which delivers superior performance and versatility. **The 773 Series is only available while current supplies last.**

WAGO encourages customers currently using the 773 Series to transition to the 2773 Series using the following direct conversion guide:

773 Series	2773 Series
773-162/102/112	2773-402
	2773-403
773-164/104/114	2773-404
	2773-405
773-166/106/116	2773-406
773-168/108/118	2773-408

The 2773 Series includes 3- and 5-port options, expanding configuration flexibility while maintaining compact form factors. The 2773 series connector is 46% smaller than our competitor, offering more room in junction boxes and tighter installations.

Key product enhancements include:

- Lower insertion forces for easier wiring
- Higher pull-out forces for secure connections
- Transparent housing with strip length indicator
- Built-in test port for all models

The 2773 Series reflects WAGO's commitment to innovation in electrical connectivity, optimizing ease of use, safety, and space savings for professionals across the industry.
