

## NTC Thermistors, Radial Leaded, Standard Precision

### FEATURES

- Accuracy over a wide temperature range
- High stability over a long life
- Excellent price/performance ratio
- UL recognized, file E148885
- Material categorization:  
For definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**RoHS**  
COMPLIANT

### APPLICATIONS

- Temperature measurement, sensing and control, temperature compensation in industrial and consumer electronics

### DESCRIPTION

These thermistors have a negative temperature coefficient. The device consists of a chip with two solid copper tin plated leads. It is grey lacquered and color coded, but not insulated.

### PACKAGING

The thermistors are packed in bulk or tape on reel; see code numbers and relevant packaging quantities.

### DESIGN-IN SUPPORT

For complete Curve Computation, visit:  
[www.vishay.com/resistors-non-linear/curve-computation-list/](http://www.vishay.com/resistors-non-linear/curve-computation-list/)

### MARKING

The thermistors are marked with colored bands; see dimensions drawing and "Electrical data and ordering information".

### MOUNTING

By soldering in any position.  
Not intended for potted applications.

| QUICK REFERENCE DATA                                                       |                                           |      |

## **R<sub>T</sub> VALUE AND TOLERANCE**

These thermistors have a narrow tolerance on the B-value, the result of which provides a very small tolerance on the nominal resistance value over a wide temperature range. For this reason the usual graphs of  $R = f(T)$  are replaced by Resistance Values at Intermediate Temperatures Tables, together with a formula to calculate the characteristics with a high precision.

## **FORMULAE TO DETERMINE NOMINAL RESISTANCE VALUES**

The resistance values at intermediate temperatures, or the operating temperature values, can be calculated using the following interpolation laws (extended "Steinhart and Hart"):

$$R_{(T)} = R_{\text{ref}} \times e^{(A/B/T + C/T^2 + D/T^3)} \quad (1)$$

$$T_{(R)} = \left( A_1 + B_1 \ln \frac{R}{R_{\text{ref}}} + C_1 \ln^2 \frac{R}{R_{\text{ref}}} + D_1 \ln^3 \frac{R}{R_{\text{ref}}} \right)^{-1} \quad (2)$$

where:

A, B, C, D, A<sub>1</sub>, B<sub>1</sub>, C<sub>1</sub> and D<sub>1</sub> are constant values depending on the material concerned; see table below.

R<sub>ref.</sub> is the resistance value at a reference temperature (in this event 25 °C, R<sub>ref.</sub> = R<sub>25</sub>).

T is the temperature in K.

Formulae numbered and are interchangeable with an error of max. 0.005 °C in the range 25 °C to 125 °C and max. 0.015 °C in the range - 40 °C to + 25 °C.

## **DETERMINATION OF THE RESISTANCE/TEMPERATURE DEVIATION FROM NOMINAL VALUE**

The total resistance deviation is obtained by combining the "R<sub>25</sub>-tolerance" and the "resistance deviation due to B-tolerance".

When:

X = R<sub>25</sub>-tolerance

Y = resistance deviation due to B-tolerance

Z = complete resistance deviation,

then:  $Z = \left[ \left( 1 + \frac{X}{100} \right) \times \left( 1 + \frac{Y}{100} \right) - 1 \right] \times 100 \%$  or  $Z \approx X + Y$

When:

TCR = temperature coefficient

ΔT = temperature deviation,

then:  $\Delta T = \frac{Z}{TCR}$

The temperature tolerances are plotted in the graphs on the previous page.

**Example:** at 0 °C, assume X = 5 %, Y = 0.89 % and TCR = 5.08 %/K (see table ), then:

$$Z = \left\{ \left[ 1 + \frac{5}{100} \right] \times \left[ 1 + \frac{0.89}{100} \right] - 1 \right\} \times 100 \%$$

$$= \{ 1.05 \times 1.0089 - 1 \} \times 100 \% = 5.9345 \% (\approx 5.93 \%)$$

$$\Delta T = \frac{Z}{TCR} = \frac{5.93}{5.08} = 1.167 \text{ °C } (\approx 1.17 \text{ °C})$$

A NTC with a R<sub>25</sub>-value of 10 kΩ has a value of 32.56 kΩ between - 1.17 °C and + 1.17 °C.

## **PARAMETER FOR DETERMINING NOMINAL RESISTANCE VALUES**

**CHARACTERISTICS OF TAPED PRODUCTS**

Minimum pull-out force of the component: 5 N

Minimum peel-off force of adhesive tape: 6 N

Minimum tearing force tape: 15 N

Minimum pull-off force of tape-reel: 5 N

**STORAGE CONDITIONS**

Storage temperature range: - 25 °C to + 40 °C

Maximum relative humidity: 80 %, non-condensing

**TESTS AND REQUIREMENTS**

Essentially all tests are carried out in accordance with "IEC publication 60068-2; Environmental testing", except where indicated.

**Notes**
<sup>(1)</sup> For  $R_{25} \geq 100 \text{ k}\Omega$  the drift requirement is  $\Delta R/R < 5 \%$ 
<sup>(2)</sup> For  $R_{25}$  from 2.2 k $\Omega$  to 10 k $\Omega$ , requirement is  $\pm 2 \%$  max.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.

## Material Category Policy

**Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as RoHS-Compliant fulfill the definitions and restrictions defined under Directive 2011/65/EU of The European Parliament and of the Council of June 8, 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) - recast, unless otherwise specified as non-compliant.**

**Please note that some Vishay documentation may still make reference to RoHS Directive 2002/95/EC. We confirm that all the products identified as being compliant to Directive 2002/95/EC conform to Directive 2011/65/EU.**

**Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as Halogen-Free follow Halogen-Free requirements as per JEDEC JS709A standards. Please note that some Vishay documentation may still make reference to the IEC 61249-2-21 definition. We confirm that all the products identified as being compliant to IEC 61249-2-21 conform to JEDEC JS709A standards.**
