1 MAIN FEATURES

ITEM	CONTENTS
Display Format	160 (RGB) x 128 Dots
Overall Dimensions	Glass 35.8 x 30.8 x 1.7 mm
Colour	262,144 Colour
Active Area	28.78 x 23.024 mm
Viewing Area	30.78 x 25.02 mm
Display Mode	Passive Matrix (1.45")
Driving Method	1/128 duty
Driver IC	SEPS525F
Operating temperature	-20 ~ +70
Storage temperature	-30 ~ +80

Product No.	DD-160128FC-1A	REV. A

3 ELECTRICAL SPECIFICATION

3.1 ABSOLUTE MAXIMUM RATINGS

VSS = 0 V, Ta = 25 °C

Item	Symbol	Min	Max	Unit	Note
Power Supply Voltage	V _{DD-VSS}	-0.3	4	V	Note 1, 2
Supply Voltage for I/O Pins	V _{DDIO}	-0.3	4	V	
OLED Power Supply	V _{DDH}	-0.3	19.5	V	
Operating Temperature	Top	-30	70	°C	
Storage Temperature	Tst	-40	80	°C	
Static Electricity	Be sure that you are grounded when handling displays.				

Note 1: All the above voltages are on the basis of “GND=0V”.

Note 2: When this module is used beyond the above absolute maximum ratings, permanent damage to the module may occur. Also for normal operations it’s desirable to use this module under the conditions according to Section 3.2 “Electrical Characteristics”. If this module is used beyond these conditions the module may malfunction and the reliability could deteriorate.

3.2 ELECTRICAL CHARACTERISTICS

Characteristics	Symbol	Conditions	Min	Typ	Max	Unit
Supply Voltage	V _{DD}		2.6	2.8	3.3	V
Supply Voltage x I/O pins	V _{DDIO}		1.6	2.8	3.3	V
Driver Supply Voltage	V _{CC}	Note 3	-	13	-	V
High Level Input	V _{IH}		0.8xV _{DD}	-	V _{DDIO}	V
Low Level Input	V _{IL}		0	-	0.4	V
High Level Output	V _{OH}		V _{DD} -0.4	-	-	V
Low Level Output	V _{OL}		-	-	0.4	V
V _{DD} Current	I _{DD}	Note 1,2	-	2.5	3.5	mA
V _{CC} Current	I _{CC}	Note 1	-	16	19	mA
		Note 2	-	27	32	mA

Note 1 V_{DD} = 2.8V, V_{CC} = 13V, Software initial setting follow chapter 5.4, 50% Display area turned on.

Note 2 V_{DD} = 2.8V, V_{CC} = 13V, Software initial setting follow chapter 5.4, 100% Display area turned on

Note 3 Brightness (Lbr) and driver supply voltage (VCC) could be changed to customer request.

3.3 INTERFACE PIN ASSIGNMENT

3.4 BLOCK DIAGRAM

MCU Interface Selection: PS and CPU

Pins connected to MCU interface: D17~D9, RS, CSB, RDB, WRB, RESETB, ENABLE, DOTCLK, HSYNC and VSYNC

When RGB mode is used, D[17:12], ENABLE, DOTCLK, HSYNC and VSYNC should follow the 6-bit RGB interface instruction. Otherwise these four inputs ENABLE, DOTCLK, HSYNC and VSYNC should be tied to VDDIO Level.

- C1: 1 μ F
- C2, C3: 4.7 μ F
- R1: 10 k Ω
- R2: 68 k Ω

5 FUNCTIONAL SPECIFICATION

5.1 COMMANDS

Please refer to the Technical Manual for the SEPS525F

5.2 POWER UP/DOWN SEQUENCE

To protect panel and extend the panel lifetime, the driver IC power up/down routine should include a delay period between high voltage and low voltage power sources during turn on/off. It gives the panel enough time to complete the action of charge and discharge before/after the operation.

5.2.1 POWER UP SEQUENCE

1. Power up V_{DD} & V_{DDIO}
2. Send Display off command
3. Clear Screen
4. Power up V_{DDH}
5. Delay 100ms (When V_{DD} & V_{DDIO} is stable)
6. Send Display on command

5.2.2 POWER DOWN SEQUENCE

1. Send Display off command
2. Power down V_{DDH}
3. Delay 100ms
(When V_{DDH} reach 0 and panel is completely discharges)
4. Power down V_{DD} & V_{DDIO}

5.3 RESET CIRCUIT

When RESETB input is low, the chip is initialized with the following status:

1. Frame frequency: 90Hz
2. OSC: internal OSC
3. Internal OSC: ON
4. DDRAM write horizontal address: MX1 = 00h, MX2 = 9Fh
5. DDRAM write vertical address: MY1 = 00h, MY2 = 7Fh
6. Display data RAM write: HC = 1, VC = 1, HV = 0
7. RGB data swap: OFF
8. Row scan shift direction: G0, G1, ..., G126, G127
9. Column data shift direction: S0, S1, ..., S478, S479
10. Display ON/OFF: OFF
11. Panel display size: FX1 = 00h, FX2 = 9Fh, FY1 = 00h, FY2 = 7Fh
12. Display data RAM read column/row address: FAC = 00h, FAR = 00h
13. Pre-charge time(R/G/B): 0 clock
14. Pre-charge current(R/G/B): 0 uA
15. Driving current(R/G/B): 0 uA

Product No.	DD-160128FC-1A	REV. A

6 PACKAGING AND LABELLING SPECIFICATION

6.1 LABELLING & MARKING

Product No.	DD-160128FC-1A	REV. A

Page	20 / 27
------	---------

7 QUALITY ASSURANCE SPECIFICATION

7.1 CONFORMITY

The performance, function and reliability of the shipped products conform to the Product Specification.

7.2 DELIVERY ASSURANCE

7.2.1 DELIVERY INSPECTION STANDARDS

MIL-STD-105E, general inspection level II, single sampling level;
IPC-AA610 rev. C, class 2 electronic assemblies standard

The quality assurance levels are shown below:

Class	AQL (%)
Critical defect	0.5%
Major defect	1.0%
Minor defect	1.5%
TOTAL	2.0%

7.2.2 Zone definition

7.2.3 Visual inspection

Test and measurement to be conducted under following conditions

Temperature:	23±5°C
Humidity:	55±15%RH
Fluorescent lamp:	30 W
Distance between the Panel & Eyes of the Inspector:	≥30cm
Distance between the Panel & the lamp:	≥50cm

Product No.	DD-160128FC-1A	REV. A

Class	Item	Criteria													
Minor	Contact Lead Twist	Not allowed 													
Minor	Contact Lead Broken	Not allowed 													
Minor	Contact Lead Bent	Not allowed if bent lead causes short circuit 													
		Not allowed if bent lead extends horizontally more than 50% of its width 													
Minor	Colour uniformity	Level of sample for approval set as limit sample													
Major		No unmelted solder paste should be present on PCB													
Critical		Cold solder joints, missing solder connections, or oxidation are not allowed													
Minor		No residue or solder balls on PCB are allowed													
Critical		Short circuits on components are not allowed													
Minor	Tray particles	<table border="1"> <thead> <tr> <th></th> <th>Size</th> <th>Quantity</th> </tr> </thead> <tbody> <tr> <td rowspan="2">On tray</td> <td>$\varnothing < 0.2$</td> <td>Any number</td> </tr> <tr> <td>$\varnothing > 0.25$</td> <td>4</td> </tr> <tr> <td rowspan="2">On display</td> <td>$\varnothing \geq 0.25$</td> <td>2</td> </tr> <tr> <td>$L = 3$</td> <td>1</td> </tr> </tbody> </table>		Size	Quantity	On tray	$\varnothing < 0.2$	Any number	$\varnothing > 0.25$	4	On display	$\varnothing \geq 0.25$	2	$L = 3$	1
	Size	Quantity													
On tray	$\varnothing < 0.2$	Any number													
	$\varnothing > 0.25$	4													
On display	$\varnothing \geq 0.25$	2													
	$L = 3$	1

7.3 DEALING WITH CUSTOMER COMPLAINTS

7.3.1 Non-conforming analysis

Purchaser should supply Densitron with detailed data of non-conforming sample.
 After accepting it, Densitron should complete the analysis in two weeks from receiving the sample.
 If the analysis cannot be completed on time, Densitron must inform the purchaser.

7.3.2 Handling of non-conforming displays

If any non-conforming displays are found during customer acceptance inspection which Densitron is clearly responsible for, return them to Densitron.
 Both Densitron and customer should analyse the reason and discuss the handling of non-conforming displays when the reason is not clear.
 Equally, both sides should discuss and come to agreement for issues pertaining to modification of Densitron quality assurance standard.

8 RELIABILITY SPECIFICATION

8.1 RELIABILITY TESTS

Test Item	Test Condition	Evaluation and assessment
High Temperature Operation	70°C±2, 240 hours	No abnormalities in function and appearance
Low Temperature Operation	-30°C±2, 240 hours	No abnormalities in function and appearance
High Temperature Storage	80°C±2, 240 hours	No abnormalities in function and appearance
Low Temperature Storage	-40°C±2, 240 hours	No abnormalities in function and appearance
High Temperature & High Humidity Storage(Operation)	60°C±2, 90%RH, 120 hours	No abnormalities in function and appearance
Thermal Shock	24 cycle of -40°C 1 Hour, 85°C 1 Hour	No abnormalities in function and appearance

- The brightness should be greater than 50% of the initial brightness.
- The samples used for above tests do not include polarizer.
- No moisture condensation is observed during tests.

8.1.1 FAILURE CHECK STANDARD

After the completion of the described reliability test, the samples were left at room temperature for 2 hrs prior to conducting the failure test at 23±5 °C; 55±15% RH

8.2 LIFE TIME

Item	Description
1	Function, performance, appearance, etc. shall be free from remarkable deterioration more than 10,000 hours under 100 CD/m ² brightness and storage conditions of room temperature (25±10 °C), normal humidity (45±20% RH), and in area not exposed to direct sunlight.
2	End of lifetime is specified as 50% of initial brightness.

Product No.	DD-160128FC-1A	REV. A

9 HANDLING PRECAUTIONS

Safety

If the panel breaks, be careful not to get the organic substance in your mouth or in your eyes.
If the organic substance touches your skin or clothes, wash it off immediately using soap and plenty of water.

Mounting and Design

Place a transparent plate (e.g. acrylic, polycarbonate or glass) on the display surface to protect the display from external pressure. Leave a small gap between the transparent plate and the display surface.

Design the system so that no input signal is given unless the power supply voltage is applied.

Caution during OLED cleaning

Lightly wipe the display surface with a soft cloth soaked with Isopropyl alcohol, Ethyl alcohol or Trichlorotrifluoroethane.

Do not wipe the display surface with dry or hard materials that will damage the polariser surface.
Do not use aromatic solvents (toluene and xylene), or ketonic solvents (ketone and acetone).

Caution against static charge

As the display uses C-MOS LSI drivers, connect any unused input terminal to V_{DD} or V_{SS} . Do not input any signals before power is turned on.

Also, ground your body, work/assembly table and assembly equipment to protect against static electricity.

Packaging

Displays use OLED elements, and must be treated as such. Avoid strong shock and drop from a height.

To prevent displays from degradation, do not operate or store them exposed directly to sunshine or high temperature/humidity.

Caution during operation

It is indispensable to drive the display within the specified voltage limit since excessive voltage shortens its life.

Other Precautions

When a display module is operated for a long of time with fixed pattern may remain as an after image or slight contrast deviation may occur.

Nonetheless, if the operation is interrupted and left unused for a while, normal state can be restored.
Also, there will be no problem in the reliability of the module.

Storage

Store the display in a dark place where the temperature is $25^{\circ}\text{C} \pm 10^{\circ}\text{C}$ and the humidity below 50%RH.

Store the display in a clean environment, free from dust, organic solvents and corrosive gases.
Do not crash, shake or jolt the display (including accessories).
