

3-terminal Filters(SMD) For Signal Line

ACF Series ACF321825, 451832 Types

FEATURES

- The ACF series consists of products with superior attenuation characteristics, in which the T-type filter circuit is magnetically shielded with ferrite.
- The series offers even greater attenuation characteristics when used in a stable circuit on the ground.
- The ACF series is ideal for high-density circuit design, since the series is vertically mounted and does not require much mounting space.
- Available for reflow soldering.
- It is a product conforming to RoHS directive.

PRODUCT IDENTIFICATION

ACF	321825	-	223	-	T
(1)	(2)	(3)	(4)		

- (1) Series name
- (2) Dimensions
- (3) Type
- (4) Packaging style

TEMPERATURE RANGES

Operating/Storage	-25 to +85°C
-------------------	--------------

PACKAGING STYLE AND QUANTITIES

Packaging style	Quantity
Taping	1000 pieces/reel

HANDLING AND PRECAUTIONS

- Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- After mounting components onto the printed circuit board, do not apply stress through board bending or mishandling.
- The inductance value may change due to magnetic saturation if the current exceeds the rated maximum.
- Do not expose the inductors to stray magnetic fields.
- Avoid static electricity discharge during handling.
- When hand soldering, apply the soldering iron to the printed circuit board only. Temperature of the iron tip should not exceed 350°C. Soldering time should not exceed 3 seconds.

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.
- Please contact our Sales office when your application are considered the following:
The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)
- All specifications are subject to change without notice.

MEASURING CIRCUIT

Technical drawing of a circular component, showing front and side views with dimensions in mm.

Front View Dimensions:

- Overall Diameter: $\varnothing 178 \pm 2.0$
- Central Hole Diameter: $\varnothing 13 \pm 0.5$
- Flange Thickness: 1.0
- Spoke Width: 2.0 ± 0.5
- Inner Hole Diameter: $\varnothing 21 \pm 0.8$

Side View Dimensions:

- Overall Height: 17.0 ± 1.4
- Central Hole Diameter: $\varnothing 60 \pm 2.0$
- Flange Thickness: 13.0 ± 0.3

Dimensions in mm

Figure 1: Schematic diagram of the experimental setup for the production of a composite material. The diagram shows a cross-section of a material with a central core and two outer layers. The core is labeled "Taping" and has a width of "40 to 80". The outer layers are labeled "200min." and "300min.". The drawing direction is indicated by an arrow pointing to the right.
