Precautions

Refer to the the Technical Information Section for general precautions.

The sensing window is made of a polycarbonate resin which withstands chloride solvents and strong acids but is soluble in strong alkali, aromatic hydrocarbons, and aliphatic hydrocarbonate chloride solvents.

The casing material uses a PBT resin which withstands chemicals and oil but is soluble in strong acid or alkali solvents.

The temperature of the terminals at the time of soldering must not exceed the following:

Item	Temperature	Permissible time	Remarks
Dip	260°C	10 sec	The portion between the base of the terminals and the position 1.5 mm from the terminal base must not be soldered.
Iron	350°C	3 sec	

The terminal base uses a polycarbonate resin, which could be deformed by excessive soldering heat.

NOTE: DIMENSIONS SHOWN ARE IN MILLIMETERS. To convert millimeters to inches divide by 25.4.
