F200 PV B type for smooth DC earth fault current for photovoltaic applications

Function: protection against the effects of sinusoidal alternating, direct pulsating and pulsating DC or smooth DC earth fault currents; protection against indirect contacts and additional protection against direct (with $I_{\Delta n}=30\text{mA}$) contacts.

Where an electrical installation includes a PV power supply system without at least simple separation between the AC side and the DC side, an RCD installed to provide fault protection by automatic disconnection of supply should be type B according to IEC 60755, amendment 2 (according to IEC 60364-7 art. 712.413.1.1.1.2)

Application: particularly suitable for use in solar energy (photovoltaic) systems

standard: IEC/EN 61008, IEC 62423

Marking: according to EN 61008
