

Ceramic Resonators (CERALOCK®)

muRata *Innovator
in Electronics*

Murata
Manufacturing Co., Ltd.

for EU RoHS Compliant

- All the products in this catalog comply with EU RoHS.
- EU RoHS is "the European Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment".
- For more details, please refer to our website 'Murata's Approach for EU RoHS' (<http://www.murata.com/info/rohs.html>).

Selection Guide

□: Alphanumerics express individual specification

Notice) "CERALOCK® for general usage" and "CERALOCK® for automotive" is different in the specification of Operating Temperature Range, Environmental Characteristics, Physical Characteristics and so on. Please choose either "for general usage" or "for automotive" according to the required specification.

● Part Numbering

CERALOCK® (MHz)

(Part Number)

CS	T	CE	16M0	V	5	3	***	-R0
----	---	----	------	---	---	---	-----	-----

①②③④⑤⑥⑦⑧⑨

① Product ID

Product ID	
CS	Ceramic Resonators

② Frequency/Capacitance

Code	Frequency/Capacitance
A	MHz No capacitance built-in
T	MHz Built-in Capacitance

③ Structure/Size

Code	Structure/Size
LS	Round Lead Type
CC	Cap Chip Type
CR/CE/CG	Small-cap Chip Type
CV	Monolithic Chip Type
CW/CZ	Small Monolithic Chip Type

④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (Hz).
 Decimal point is expressed by capital letter "M".

⑤ Design

Code	Design
G□□	Thickness Shear mode
T/V□□	Thickness Expander mode
X□□	Thickness Expander mode (3rd overtone)

□□ indicates initial frequency tolerance and load capacity.

CERALOCK® (kHz)

(Part Number)

CS	B	FB	500K	J58	***	-R1
----	---	----	------	-----	-----	-----

①②③④⑤⑥⑦

① Product ID

Product ID	
CS	Ceramic Resonators

② Frequency/Capacitance

Code	Frequency/Capacitance
B	kHz No capacitance built-in

③ Structure/Size

Code	Structure/Size
LA	Two-Terminal Lead Type
FB	SMD Type

④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (Hz).
 Capital letter "K" following three figures expresses the unit of "kHz". In case of 1.0MHz (1000kHz) or above, expressed by three figures and capital letter "M" for decimal point.

⑥ Initial Frequency Tolerance

Code	Design
5	±0.5%
3	±0.3%
2	±0.2%
1	±0.1%
H	±0.07%
K	-0.025/0.02%

⑦ Load Capacity

Code	Design
1	3/5/6pF
2	10pF
3	15pF
4	22pF
5	30/33/39pF
6	47pF

⑧ Individual Specification

Code	Individual Specification
***	Three-digit alphanumerics express "Individual Specification".

With standard products, "⑧ Individual Specification" is omitted, and "⑨ Packaging" is carried up.

⑨ Packaging

Code	Packaging
-B0	Bulk
-A0	Radial Taping H ₀ =18mm
-R0	Plastic Taping ø=180mm
-R1	Plastic Taping ø=330mm

Radial taping is applied to lead type and plastic taping to chip type.

⑤ Design

Code	Design
E□□	Area Expansion mode
J□□	Area Expansion mode (Closed Type)

□□ indicates initial frequency tolerance and load capacitance.

⑥ Individual Specification

Code	Individual Specification
***	Three-digit alphanumerics express "Individual Specification".

With standard products, "⑥ Individual Specification" is omitted, and "⑦ Packaging" is carried up.

⑦ Packaging

Code	Packaging
-B0	Bulk
-R1	Plastic Taping ø=330mm

Ceramic Resonators (CERALOCK®)

muRata

MHz Chip Type -Tight Frequency Tolerance for Automotive-

Chip type "CERALOCK" with built-in load capacitors in an extremely small package provides high accuracy. MURATA's frequency adjustment and package technology expertise has enabled the development of the chip "CERALOCK" with built-in load capacitors. Chip "CERALOCK" for automotive has achieved importance in the worldwide automotive market. This diverse series owes its development to MURATA's original mass production techniques and high reliability.

■ Features

1. The series are high accuracy resonators whose total tolerance is available for less than $\pm 3,000\text{ppm}$.
2. The series has high reliability and is available for wide temperature range.
3. Oscillation circuits do not require external load capacitors.
4. The series is available for a wide temperature range.
5. The resonators are extremely small and have a low profile.
6. No adjustment is necessary for oscillation circuits.

■ Applications

1. Cluster panel and Control panel
2. Safety control
(Anti-lock Brake System, Electronic Stability Control, Airbag, etc.)
3. Engine ECU, Electronic Power Steering, Immobilizer, etc.
4. Car Air-conditioner, Power window, Remote Keyless Entry system, etc.
5. Intelligent Transportation System
(Lane Keeping System, Millimeter wave radar, etc.)
6. Battery control for hybrid car

CSTCR_G15C
4.00-7.99MHz

CSTCE_G15C
8.00-13.99MHz

CSTCE_V13C
14.00-20.00MHz

Part Number	Oscillating Frequency (MHz)	Initial Tolerance	Temp. Stability (%)	Temperature Range (°C)
CSTCR_G15C	4.00 to 7.99	$\pm 0.1\%$	± 0.13	-40 to 125
CSTCE_G15C	8.00 to 13.99	$\pm 0.1\%$	± 0.13	-40 to 125
CSTCE_V13C	14.00 to 20.00	$\pm 0.1\%$	± 0.13	-40 to 125

Irregular or stop oscillation may occur under unmatched circuit conditions. Please check the actual conditions prior to use.

MHz Chip Type Notice (Soldering and Mounting) for Automotive

■ CSTCC/CSTCR/CSTCE_V/CSTCE_G/CSTCV/CSACV Series

1. Soldering Conditions

(1) Reflow

One heat stress, shown in the profile at right, is applied to resonator; then, after being placed in natural conditions for 1 hour, the resonator is measured.

- Pre-heating conditions should be +150 to +180°C for 60 to 120 seconds. Ascending time up to +150°C should be longer than 30 seconds.
- Heating conditions should be within 40 seconds at +230°C min., but peak temperature should be lower than +260°C.

(2) Soldering Iron

Components shall be measured after soldering on PCB at +350±5°C for 3.0±0.5 seconds and leaving in natural condition for 24 hours. The soldering iron shall not touch the components while soldering.

2. Wash

(1) Cleaning Solvents

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

dT≤60°C (dT=Component-solvent)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then dT=30°C.

(3) Conditions

(a) Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency: 28kHz, Output: 20W/l)

(b) Immersion Wash

5 minutes max. in above solvent at +60°C max.

(c) Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

- Total washing time should be within 10 minutes.
- The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

3. Notice for Mounting

- The component is recommended for use with placement machines which employ optical placement capabilities. The component might be damaged by excessive mechanical force. Please make sure to evaluate by using placement machines before going into mass production. Do not use placement machines which utilize mechanical positioning. Please contact Murata for details beforehand.

- Please insure the component is thoroughly evaluated in your application circuit.
- Please do not apply excess mechanical stress to the component and terminals during soldering.

MHz Chip Type Notice for Automotive

■ Notice (Storage and Operating Conditions)

1. Product Storage Condition

Please store the products in room where the temperature/humidity is stable. And avoid such places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to + 40 degrees C

Humidity: 15 to 85% R.H.

2. Expire Date on Storage

Expire date (Shelf life) of the products is six months after delivery under the conditions of a sealed and an unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because the products may be degraded in the solderability and/or rusty. Please confirm solderability and characteristics for the products regularly.

3. Notice on Product Storage

- (1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality, and/or be degraded in the solderability due to the storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.

- (3) Please do not store the products in the places such as: in a damp heated place, in a place where direct sunlight comes in, in place applying vibrations.

- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality, and/or be degraded in the solderability due to storage under the poor condition.

- (5) Please do not drop the products to avoid cracking of ceramic element.

4. Others

Conformal coating of the component is acceptable. However, the resin material, curing temperature, and other process conditions should be evaluated to confirm that stable electrical characteristics are maintained.

Please be sure to consult with our sales representative or engineer whenever and prior to using the products.

■ Notice (Rating)

The component may be damaged if excess mechanical stress is applied.

■ Notice (Handling)

"CERALOCK" may stop oscillating or oscillate irregularly under improper circuit conditions.

Ceramic Resonators (CERALOCK®)

MHz Chip Type -Tight Frequency Tolerance for General Usage-

Chip type "CERALOCK" with built-in load capacitors in an extremely small package provides high accuracy. MURATA's frequency adjustment and package technology expertise has enabled the development of the chip "CERALOCK" with built-in load capacitors.

High-density mounting can be realized because of the small package and the elimination of the need for an external load capacitor.

■ Features

1. High accuracy resonator realizes initial tolerance of ± 250 ppm.
2. Oscillation circuits do not require external load capacitors.
3. The series is available in a wide frequency range.
4. The resonators are extremely small and have a low profile.
5. No adjustment is necessary for oscillation circuits.

■ Applications

1. Clock oscillators for USB (High-speed and Full-speed) controller ICs
2. Storage devices with SATA interface (HDD, Optical storage device, etc.)
3. Audio equipment and musical instrument, etc.
4. Other applications for replacement from Crystal Oscillators

3

The diagram illustrates the internal structure of the CSTCW_X11 module. It features a differential pair of NMOS transistors enclosed in a dashed box, with nodes labeled (1), (2), and (3). A PMOS tail current source is connected to ground (2). The gates of the NMOS transistors are biased by a VDD supply through a resistor network consisting of R_f and R_d . The outputs of the differential pair are connected to two inverters, the second of which is labeled 'To Frequency counter'.

Diagram illustrating the dimensions for the CSTCR_G15L land pattern. The pattern consists of three rectangular pads. The dimensions are specified in millimeters (mm):

- Pad width: 0.4 mm
- Pad height: 2.6 mm
- Distance between pads (center-to-center): 1.5 mm
- Distance from the center of a pad to the center of the next pad: 1.1 mm
- Distance from the center of a pad to the edge of the next pad: 0.4 mm

The label "Land Pattern" points to the pads.

Oscillation Frequency Measuring Circuit

Oscillation Frequency Temperature Stability

Ceramic Resonators (CERALOCK®)

kHz Chip Type -Standard Frequency Tolerance for General Usage-

MURATA's original package technologies have enabled the development of the kHz band "CERALOCK". The series is perfect in miniature remote control units and AV modules.

"CERALOCK" can be reflow soldered and mounted by automatic placers.

■ Features

1. The series withstands reflow soldering.
2. The series is mountable by automatic placers.
3. No adjustment is necessary for oscillation circuits.

■ Applications

1. Clock oscillators for microprocessors
2. OA equipment
3. AV modules

CSBFB_J

Ceramic Resonators (CERALOCK®)

muRata

kHz Lead Type -Standard Frequency Tolerance for General Usage-

The CSBLA series ceramic resonators owe their development to MURATA's innovative expert technologies and the application of mass production techniques typically utilized in the manufacture of piezoelectric ceramic components. Because of their high mechanical Q and consistent high quality, the CSBLA series are ideally suited to microprocessor and remote control unit applications.

■ Features

1. The series is stable over a wide temperature range and with respect to long-term aging.
2. The series comprises fixed, tuned, solid-state devices.
3. The resonators are miniature and lightweight.
4. They exhibit excellent shock resistance performance.
5. Oscillating circuits requiring no adjustment can be designed by utilizing these resonators in conjunction with transistors or appropriate ICs.

■ Applications

1. Square-wave and sine-wave oscillators
2. Clock generator for microprocessors
3. Remote control systems

CSBLA_E
375-429kHz

CSBLA_E
430-509kHz

CSBLA_E
510-699kHz

CSBLA_J
700-1250kHz

Part Number	Oscillating Frequency (kHz)	Initial Tolerance	Temp. Stability (%)	Temperature Range (°C)
CSBLA_E	375 to 699	-	±0.3	-20 to +80
CSBLA_J	700 to 1250	±0.5%	±0.3	-20 to 80

Irregular or stop oscillation may occur under unmatched circuit conditions. Please check the actual conditions prior to use.

The order quantity should be an integral multiple of the "Minimum Quantity" shown in the packaging page.

MHz Chip Type Notice (Soldering and Mounting) for General Usage

■ CSTCC Series

1. Soldering Conditions

(1) Reflow

One heat stress, shown in the profile at right, is applied to resonator; then, after being placed in natural conditions for 1 hour, the resonator is measured.

(a) Pre-heating conditions should be +150 to +180°C for 60 to 120 seconds. Ascending time up to +150°C should be longer than 30 seconds.

(b) Heating conditions should be within 40 seconds at +230°C min., but peak temperature should be lower than +260°C.

(2) Soldering Iron

Components shall be measured after soldering on PCB at +350±5°C for 3.0±0.5 seconds and leaving in natural condition for 24 hours. The soldering iron shall not touch the components while soldering.

2. Wash

Some series do not withstand washing.

Please check the list at right before use.

Series	Wash
CSTCC (Except 2.00 - 3.49MHz)	Available
CSTCC (Only 2.00 - 3.49MHz)	Not Available

(1) Cleaning Solvents

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

dT≤60°C (dT=Component-solvent)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then dT=30°C.

(3) Conditions

(a) Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency: 28kHz, Output: 20W/l)

(b) Immersion Wash

5 minutes max. in above solvent at +60°C max.

(c) Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

(a) Total washing time should be within 10 minutes.

(b) The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

3. Notice for Mounting

(a) The component is recommended for use with placement machines which employ optical placement capabilities. The component might be damaged by excessive mechanical force. Please make sure to evaluate by using placement machines before going into mass production. Do not use placement machines which utilize mechanical positioning. Please contact Murata for details beforehand.

(b) Please insure the component is thoroughly evaluated in your application circuit.

(c) Please do not apply excess mechanical stress to the component and terminals during soldering.

MHz Chip Type Notice (Soldering and Mounting) for General Usage

■ CSTCR/CSTCE_V/CSTCG/CSTCE_G/CSTCE_XK Series

1. Soldering Conditions

(1) Reflow

One heat stress, shown in the profile at right, is applied to resonator; then, after being placed in natural conditions for 1 hour, the resonator is measured.

(a) Pre-heating conditions should be +150 to +180°C for 60 to 120 seconds. Ascending time up to +150°C should be longer than 30 seconds.

(b) Heating conditions should be within 40 seconds at +230°C min., but peak temperature should be lower than +260°C.

(2) Soldering Iron

Components shall be measured after soldering on PCB at +350±5°C for 3.0±0.5 seconds and leaving in natural condition for 24 hours. The soldering iron shall not touch the components while soldering.

2. Wash

Please contact us in case you need washable component.

3. Notice for Mounting

(a) The component is recommended for use with placement machines which employ optical placement capabilities. The component might be damaged by excessive mechanical force. Please make sure to evaluate by using placement machines before going into mass production. Do not use placement machines which utilize mechanical positioning. Please contact Murata for details beforehand.

(b) Please insure the component is thoroughly evaluated in your application circuit.

(c) Please do not apply excess mechanical stress to the component and terminals during soldering.

MHz Chip Type Notice (Soldering and Mounting) for General Usage

■ CSTCV/CSACV Series

1. Soldering Conditions

(1) Reflow

One heat stress, shown in the profile at right, is applied to resonator; then, after being placed in natural conditions for 1 hour, the resonator is measured.

- Pre-heating conditions should be +150 to +180°C for 60 to 120 seconds. Ascending time up to +150°C should be longer than 30 seconds.
- Heating conditions should be within 40 seconds at +230°C min., but peak temperature should be lower than +260°C.

(2) Soldering Iron

Components shall be measured after soldering on PCB at +350±5°C for 3.0±0.5 seconds and leaving in natural condition for 24 hours. The soldering iron shall not touch the components while soldering.

2. Wash

(1) Cleaning Solvents

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

dT ≤ 60°C (dT = Component-solvent)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then dT = 30°C.

(3) Conditions

(a) Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency: 28kHz, Output: 20W/l)

(b) Immersion Wash

5 minutes max. in above solvent at +60°C max.

(c) Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

- Total washing time should be within 10 minutes.
- The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

3. Notice for Mounting

- The component is recommended for use with placement machines which employ optical placement capabilities. In some cases, placement machines which utilize mechanical positioning may apply excessive mechanical force which might result in damage to the ceramic resonator. Please contact Murata before mounting this product using placement machines which use mechanical positioning.

- Please insure the component is thoroughly evaluated in your application circuit.
- Please do not apply excess mechanical stress to the component and terminals during soldering.

MHz Chip Type Notice (Soldering and Mounting) for General Usage

■ CSACW/CSTCW/CSTCZ Series

1. Soldering Conditions

(1) Reflow

One heat stress, shown in the profile at right, is applied to resonator; then, after being placed in natural conditions for 1 hour, the resonator is measured.

- (a) Pre-heating conditions should be +150 to +180°C for 60 to 120 seconds. Ascending time up to +150°C should be longer than 30 seconds.
- (b) Heating conditions should be within 40 seconds at +230°C min., but peak temperature should be lower than +260°C.

(2) Soldering Iron

Components shall be measured after soldering on PCB at $+350 \pm 5^\circ\text{C}$ for 3.0 ± 0.5 seconds and leaving in natural condition for 24 hours. The soldering iron shall not touch the components while soldering.

2. Wash

Please contact us in case you need washable component.

3. Notice for Mounting

- (a) Please insure the component is thoroughly evaluated in your application circuit.
- (b) Please do not apply excess mechanical stress to the component and terminals during soldering.

MHz Chip Type Notice for General Usage

■ Notice (Storage and Operating Conditions)

1. Product Storage Condition

Please store the products in room where the temperature/humidity is stable. And avoid such places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to + 40 degrees C

Humidity: 15 to 85% R.H.

2. Expire Date on Storage

Expire date (Shelf life) of the products is six months after delivery under the conditions of a sealed and an unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because the products may be degraded in the solderability and/or rusty. Please confirm solderability and characteristics for the products regularly.

3. Notice on Product Storage

- (1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality, and/or be degraded in the solderability due to the storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.

- (3) Please do not store the products in the places such as: in a damp heated place, in a place where direct sunlight comes in, in place applying vibrations.

- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality, and/or be degraded in the solderability due to storage under the poor condition.

- (5) Please do not drop the products to avoid cracking of ceramic element.

4. Others

Conformal coating or washing of the component is not acceptable because it is not hermetically sealed.

Please be sure to consult with our sales representative or engineer whenever and prior to using the products.

■ Notice (Rating)

The component may be damaged if excess mechanical stress is applied.

■ Notice (Handling)

"CERALOCK" may stop oscillating or oscillate irregularly under improper circuit conditions.

MHz Lead Type Notice for General Usage

■ Notice (Soldering and Mounting)

1. Soldering Conditions

(1) Reflow

The component cannot withstand reflow soldering.

(2) Soldering Iron

- (a) Lead terminals are immersed up to 1.5 mm from components body in soldering bath of +260+/-5 degrees C for 10+/-1.0 seconds, and then components shall be left in natural condition for 1 hour.

- (b) Lead terminal is directly contacted with the tip of soldering iron of +350+/-5 degrees C

for 3.0+/-0.5 seconds, and then components shall be left in natural condition for 1 hour.

- (3) Please do not apply excessive mechanical stress to the component and lead terminals during soldering.

2. Wash

The component cannot withstand washing.

■ Notice (Storage and Operating Conditions)

Position of sprocket hole	W ₁	9.0	±0.5	
Gap of hold down tape and carrier tape	W ₂	0	+0.5 -0	
Distance between the center of sprocket hole and lead stopper	H ₀	18.0	±0.5	
Total height of resonator	H ₁	24.5	±1.0	
Diameter of sprocket hole	D ₀	ø4.0	±0.2	
Total tape thickness	t	0.6	±0.2	
Body tilt	dS	0	±1.0	

(in mm)

kHz Type Packaging for General Usage

■ CSBFB Series Minimum Quantity

Part Number	Plastic Tape ø330mm	Bulk
CSBFB_J (430 to 519kHz)	1,500	500
CSBFB_J (700 to 1250kHz)	3,000	1,000

The order quantity should be an integral multiple of the "Minimum Quantity" shown above. (pcs.)

The order quantity should be an integral multiple of the "Minimum Quantity" shown above. (pcs.)

■ Dimensions of Reel

Technical drawing of a circular component with three segments and a central hole. The drawing includes a top view and a side view.

Top View Dimensions:

- Segment width: 2.0 ± 0.5
- Segment radius: $\phi 13.0 \pm 0.2$

Side View Dimensions:

- Segment height: 17.5 ± 0.5
- Segment thickness: 21.5 ± 1.0
- Overall diameter: $(\phi 330 \pm 2.0)$
- Central hole diameter: $(\phi 80 \pm 1.0)$

(in mm)

■ Dimensions of Taping

■ CSBLA Series Minimum Quantity

Part Number	Magazine	Bulk
CSBLA_E	50	500
CSBLA_J	100	1,000

The order quantity should be an integral multiple of the "Minimum Quantity" shown above. (pcs.)

The order quantity should be an integral multiple of the "Minimum Quantity" shown above. (pcs.)

△Note:

1. Export Control

<For customers outside Japan>

No muRata products should be used or sold, through any channels, for use in the design, development, production, utilization, maintenance or operation of, or otherwise contribution to (1) any weapons (Weapons of Mass Destruction [nuclear, chemical or biological weapons or missiles] or conventional weapons) or (2) goods or systems specially designed or intended for military end-use or utilization by military end-users.

<For customers in Japan>

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2. Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below, which require especially high reliability for the prevention of defects which might directly damage a third party's life, body or property, or when one of our products is intended for use in applications other than those specified in this catalog.

- | | |
|-----------------------------|--|
| ① Aircraft equipment | ② Aerospace equipment |
| ③ Undersea equipment | ④ Power plant equipment |
| ⑤ Medical equipment | ⑥ Transportation equipment (vehicles, trains, ships, etc.) |
| ⑦ Traffic signal equipment | ⑧ Disaster prevention / crime prevention equipment |
| ⑨ Data-processing equipment | ⑩ Application of similar complexity and/or reliability requirements to the applications listed above |

3. Product specifications in this catalog are as of September 2007. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.

4. Please read rating and △ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

6. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or a third party's intellectual property rights and other related rights in consideration of your use of our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.

7. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.
