

6th Generation CoolSiC™

650V SiC Schottky Diode

The CoolSiC™ Generation 6 is the leading edge technology from Infineon for the SiC Schottky Barrier diodes. The Infineon proprietary diffusion soldering process is combined with a more compact design, thin-wafer technology and a novel Schottky metal system. The result is a family of products with improved efficiency over all load conditions, resulting from a lower figure of merit ($Q_c \times V_F$). CoolSiC™ Generation 6 has been designed to complement our 600V and 650V CoolMOS™ 7 families, meeting the most stringent application requirements in this voltage range.
