

We would like to tell you about a change that affects some products that you purchase from us.

The WAGO 2102 Series of TOPJOB S DIN rail mount terminals with lever have a new Inmetro certificate number (Issue 66388). The old certificate number is replaced by the new number.

In addition to this change, further approvals have been added (UKCA & CE) and KEMA KEUR was replaced by DEKRA.

The part numbers will not change.

This change will be integrated during the next six months.

Delivery of mixed configuration of old and new is possible but both versions can be used together.
