Description

PS783-I13GL1 is a highly stable and reliable piezo-resistive pressure sensor with wide temperature compensation and zero correction. Optimized for middle to high pressures, the PS783-I13GL1 contains a highly stable silicon die, stainless steel 316L housing with diameter 12.6 mm. The measured pressure is transmitted onto the silicon die through the 316L diaphragm and inner media. This transforms the measured pressure into an electrical signal.
