Typical Electromechanical Relay

General Purpose Relays

General purpose relays are electromechanical relays which consist of a coil, armature and contacts (see figure at left).

Principle of Operation

When power is applied to the coil, the resulting magnetic field causes the armature to move and the contacts to open or close.

Applications

With multiple options, features and available accessories, Magnecraft general purpose relays offer a complete system solution to improve your design, expedite installation and simplify testing of your application.

Typical Examples of General Purpose Relay Applications

Automation Panels

Process controls, motor controls, standby lighting

Food & Beverage

Commercial/industrial cooking equipment, filtration systems, bottling, chillers, convection ovens

Packaging Machinery

Conveyor motors, food processors, product/shrink wrap, solenoid controls

Lighting Control

Traffic signal systems, motorway information systems, theatrical lighting, ballast lighting

Power Supplies

Universal power supplies, battery backup systems

Material Handling

Motor control, conveyor controls

HVAC & Refrigeration

Anti-condensation equipment, compressor controls, blower controls, motorized duct/vent controls

Appliances

Air conditioners, water heaters, portable heaters, spa controls, water pumps
