  - Especially suitable for intensive read/write operations
  - Advanced power-off reliability technology
  - Wear Leveling technology  
Equal wear leveling of static and dynamic data. The wear leveling assures that dynamic data as well as static data is balanced evenly across the memory. With that the maximum write endurance of the device is guaranteed
  - The S-50u High Reliability Series is optimized for high read/write traffic for demanding industrial applications.

<sup>1</sup> The verification of host system and storage device compatibility is in customer's responsibility. Swissbit can provide guidance and support on request.

<sup>2</sup> @Ambient temperature

<sup>3</sup> NAND Flash data retention and endurance characteristics are defined according to JEDEC JESD47 and JESD22. The endurance limits of the storage shall be monitored by the life time information and simulated before field usage by the customer.

## S-50u High reliability series

- Read Disturb Management  
The read commands are monitored and the content is refreshed when critical levels have occurred
- Data Care Management  
The interruptible background process maintain the user data for Read Disturb effects or Retention degradation due to high temperature effects
- Near miss ECC technology  
Minimize the risk of uncorrectable bit failure over the product life time. Each read command analyzes the ECC margin level and refresh data if necessary
- Diagnostic features with Life Time Monitoring tool support
- High reliability
  - The product is optimized for long life cycle that requires superior data retention because of high temperature mission profile
  - FW is designed to ensure highest reliability at lowest possible DPPM rates
  - Number of card insertions/removals up to 20,000
  - Industrial Temperature range -40° up to 85°C inclusive full cross temperature support<sup>4</sup>
  - SIP (System In Package) process for extreme dust, water and ESD proof
- Controlled BOM & PCN process
- Customized options like CID registers, CPRM keys, firmware incl. settings and marking on request
