

**Is Now Part of**

**ON Semiconductor®**

**To learn more about ON Semiconductor, please visit our website at**  
**[www.onsemi.com](http://www.onsemi.com)**

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at [www.onsemi.com](http://www.onsemi.com). Please email any questions regarding the system integration to [Fairchild\\_questions@onsemi.com](mailto:Fairchild_questions@onsemi.com).

ON Semiconductor and the ON Semiconductor logo are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ## 600 V, 7 A

### Short Circuit Rated IGBT

#### Features

- Short Circuit Rated 10 us
- High Current Capability
- High Input Impedance
- Fast Switching
- RoHS Compliant

#### Applications

- Sewing Machine, CNC, Home Appliances, Motor Control

#### General Description

Using advanced NPT IGBT technology, Fairchild's the NPT IGBTs offer the optimum performance for low-power inverter-driven applications where low-losses and short-circuit ruggedness features are essential, such as sewing machine, CNC, motor control and home appliances.

#### Absolute Maximum Ratings

| Symbol       | Description                                                             | Ratings     | Unit             |
|--------------|-------------------------------------------------------------------------|-------------|------------------|
| $V_{CES}$    | Collector to Emitter Voltage                                            | 600         | V                |
| $V_{GES}$    | Gate to Emitter Voltage                                                 | $\pm 20$    | V                |
| $I_C$        | Collector Current @ $T_C = 25^\circ\text{C}$                            | 14          | A                |
|              | Collector Current @ $T_C = 100^\circ\text{C}$                           | 7           | A                |
| $I_{CM} (1)$ | Pulsed Collector Current @ $T_C = 25^\circ\text{C}$                     | 21          | A                |
| $I_F$        | Diode Forward Current @ $T_C = 25^\circ\text{C}$                        | 7           | A                |
|              | Diode Forward Current @ $T_C = 100^\circ\text{C}$                       | 3.5         | A                |
| $P_D$        | Maximum Power Dissipation @ $T_C = 25^\circ\text{C}$                    | 83          | W                |
|              | Maximum Power Dissipation @ $T_C = 100^\circ\text{C}$                   | 33          | W                |
| $T_J$        | Operating Junction Temperature                                          | -55 to +150 | $^\circ\text{C}$ |
| $T_{stg}$    | Storage Temperature Range                                               | -55 to +150 | $^\circ\text{C}$ |
| $T_L$        | Maximum Lead Temp. for soldering Purposes, 1/8" from case for 5 seconds | 300         | $^\circ\text{C}$ |

#### Notes:

1: Repetitive rating: Pulse width limited by max. junction temperature

#### Thermal Characteristics

| Symbol                        | Parameter                                              | Typ. | Max. | Unit               |
|-------------------------------|--------------------------------------------------------|------|------|--------------------|
| $R_{\theta JC}(\text{IGBT})$  | Thermal Resistance, Junction to Case                   |      | 1.5  | $^\circ\text{C/W}$ |
| $R_{\theta JC}(\text{Diode})$ | Thermal Resistance, Junction to Case                   |      | 3.5  | $^\circ\text{C/W}$ |
| $R_{\theta JA}$               | Thermal Resistance, Junction to Ambient (PCB Mount)(2) |      | 40   | $^\circ\text{C/W}$ |

#### Notes:

2: Mounted on 1" square PCB (FR4 or G-10 material)

## Package Marking and Ordering Information

Package drawings are provided as a service to customers considering Fairchild components. Drawings may change in any manner without notice. Please note the revision and/or date on the drawing and contact a Fairchild Semiconductor representative to verify or obtain the most recent revision. Package specifications do not expand the terms of Fairchild's worldwide terms and conditions, specifically the warranty therein, which covers Fairchild products.

Always visit Fairchild Semiconductor's online packaging area for the most recent package drawings:
