

Echo 36

2G/3G/4G and WiFi Embedded FPC Antenna

Key Features

- Wide Bandwidth Antenna
- Peak Gain 3dBi
- Designed for embedded applications

General Description

The Echo 36 is an embedded wideband FPC antenna with a good peak gain performance.

The wideband allows for a migration plan from one technology to another; 2G to 3G to 4G, or simply the choice to select a technology depending on usage.

Additionally this antenna is also suitable for WiFi connection using the 2400MHz band.

Typically supplied with a uFL/IPEX connector and a short tail of cable. Alternative cable lengths and connectors can be supplied for volume requirements.

Additional Considerations

- Small format design for applications with limited space
- Meets all EU compliance criteria for electronic goods
- Flexible ultra thin circuit board
- Mount on plastic surface for best performance
