Custom Panels

OMEGA® Miniature Jack Panels are fabricated using miniature panel jacks and snap strip assemblies in a clear anodized aluminum plate. Because of the infinite variety of panel sizes and the different thermocouple calibrations, we are not able to list prices. Special panels are available with switches, meter or both. Please consult the Sales Department for price on any configuration not listed. Specify number of rows, total number of jacks and calibration. All prices include panel and jacks.

The connector bodies are molded from high-impact plastic and have a maximum service temperature of 205°C (401°F). The panels are machined from rugged 2.3 mm (0.09") aluminum with a brushed finish. Clear anodizing adds durability and corrosion resistance.
