

Pulse Control Module

Converts 4 to 20 mA
to Proportional Power Control

PCM4

- ✓ Converts 4 to 20 mA Input from Temperature Controller or Computer to Time Proportional Output
- ✓ Mounts Directly on an OMEGA® 3 to 32 Vdc Input SSR
- ✓ Supports Single or 3-Phase Operation
- ✓ 50 or 60 Hz Operation

PCM4 shown actual size mounted on SSR240DC10

PCM4 shown actual size.

The OMEGA® PCM series converter modules facilitate conversion of a 4 to 20 mA output to an on/off time proportioning output. The modules mount directly to the input terminals of an SSR. Screw terminals are provided on the converter of the 4 to 20 mA control signal. The SSR's power section connects in standard fashion to the line and load.

The PCM module with a solid state relay provides a rectangular shape, time proportional (zero-fired) control signal to the load. Thus, the average power to the load is proportional to the 4 to 20 mA input signal.

Specifications

Analog Input Signal: 4 to 20 mAdc

Note: Control signal cannot drop below 4 mAdc or improper operation may occur.

Compliance Voltage Requirement:

Time Base: 3 cycle resolution

6.4 Vdc (320 Ω @ 20mA)

Ambient Temperature:

0 to 40°C (32 to 104°F)

Dimensions:

32 W x 45 L x 20 mmD

(1.25 x 1.75 x 0.75")

Single-Phase Application

3-Phase Application

To Order

Model No.	Description
PCM4	Pulse control module

Comes complete with operator's manual.

Ordering Example: PCM4, pulse control module that supports 1 or 2 SSR's.
