

Features:

- 5W Small Compact SIP style AC-DC converter
- Wide AC & DC Input 85V to 305VAC, 70-430VDC
- Temperature Range -40°C to +85°C
- EMC Compliant with external components
- Output Range: 3.3V - 24VDC
- Low Standby Power 0.1W
- Fully Isolated Pri - Sec >3000Vrms
- Safety: Class II
- Materials: UL94-V0
- IEC/EN/UL62368, IEC/EN61558, IEC/EN60335
- 3 Year Warranty

Description

VTX-215-005-0## is a compact SIP style AC-DC power converter. It They feature wide input range accepting either AC or DC voltage, high efficiency, low power consumption and CLASS II reinforced insulation. All models are particularly suitable for industrial control, electric power, instrumentation and smart home applications which don't have high requirement for dimension. A variety of EMC external circuits meet the needs of multiple industries we recommend using the application circuit show in this Datasheet or contact our Technical team for further support.

Selection Guide

Note: For additional filtering requirements, contact technical support

1. C1 is used as filter capacitor with AC input (must be connected externally) and as EMC filter capacitor with DC input (must be connected), and it is recommended to use the capacitor with ripple current $>200\text{mA}@100\text{KHz}$.
2. We recommend using an electrolytic capacitor with high frequency and low ESR (ESR of C3 at low temperature of $-40^{\circ}\text{C}\leq 1.1\Omega$) rating for C3 (refer to manufacture's datasheet), electrolytic capacitor can be used for C2 when applied in normal and high temperature environments. Combined with C2, L1, they form a pi-type filter circuit. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C4 is a ceramic capacitor, used for filtering high frequency noise.
3. A suppressor diode (TVS) is recommended to protect the application in case of converter failure and specification should be 1.2 times of the output voltage.
