AMES350-NZ

Enclosed

The AMES350-NZ is an AC/DC converter that offers great cost effectiveness due to material normalization and production automation also leading to improved reliability and performance. It features both a universal AC input of 90-132VAC / 180-264VAC as well as a DC input voltage range of 240-370VDC. They offer great EMC performance and meet EN/IEC62368 safety standards.

This series offers great operating temperatures, from -25°C to 70°C and also features an isolation of 3000VAC for improved reliability and system safety. Furthermore, a high MTBF of 3 540khrs, output short circuit protection (OSCP), output over-current protection (OCP), output over-voltage protection (OVP) and over-temperature protection (OTP) come standard with the series.

The AMES350-NZ is suitable for street lighting controls, grid power, instrumentation, industrial controls, communication, and civil applications.
