

TAOGLAS®

Datasheet

Wi-Fi Barracuda

Part No:
OMB.242.08F21

Description:

8dBi Omni-Directional Outdoor Antenna
For Wi-Fi/Bluetooth/Zigbee 2.4-2.5dBi

Features:

Omni-Directional Radiation Pattern
Collinear
8dBi Peak Gain
Robust Design for all Weather Operation
Length: 553mm
Diameter: 24mm
Weight: 380g
IP65 Waterproof
N Type Female Connector
Wall/Pole Mount Bracket Included
RoHS & Reach Compliant

1. Introduction

The Barracuda OMB.242.08F21 has been designed to provide long distance coverage at the 2.4-2.5GHz Wi-Fi band. The OMB.242 is a fiberglass robust outdoor antenna for use where an omnidirectional radiation pattern is required. The base is aluminum - meaning it is resistant to rusting. The fiberglass enclosure is UV coated making this antenna suitable for the harshest outdoor environments. The Barracuda is IP65 rated and can be mounted in areas where installation may be difficult.

The peak gain of 8dBi ensures constant reception and transmission between the device and its network. The omnidirectional antenna collinear dipole design means it uniformly in the azimuth with a high gain, providing coverage over long distances, thus minimizing the number of cells or nodes needed in a network.

Typical Applications Include:

- Public Safety
- Wireless Video Systems
- Agriculture

This antenna is provided with a wall/pole mount bracket, for more information please contact your regional Taoglas customer support team.

2. Specifications

Wi-Fi MIMO	
Frequency (MHz)	2400~2500
Efficiency (%)	
Free Space	97
Average Gain (dB)	
Free Space	-0.12
Peak Gain (dBi)	
Free Space	8.0
Impedance	50 Ohms
Polarization	Vertical
Radiation Pattern	Omni
Max. input power	50W
VSWR	≤ 1.3
Vertical Beamwidth	57°
Horizontal Beamwidth	360°

Mechanical	
Connector	N Type Female
Connector Location	Bottom
Dimensions	Length 553mm, Diameter 24mm
Radome Diameter	24mm
Weight (& Mounting Bracket max)	380g
Internal Material	Copper
Radome Material	White Fiberglass
Base Material	Aluminium
Waterproof	IP65
Mounting Style	Pole Mount/Wall Mount
Mounting	32-45mm Stainless Steel U-Type Screw
Wind Survival	>150mph(>241km/h)
Operating Temperature	-40°C to +60°C
Storage Temperature	-40°C to +80°C
Operating Humidity	10%~90% non-condensing
Storage Humidity	5%~90% non-condensing

3. Antenna Characteristics

3.1 Return Loss

3.2 VSWR

3.3 Efficiency

3.4 Average Gain

3.5 Peak Gain

4. Radiation Patterns

4.1 Test Setup

Free space

4.2 3D & 2D Radiation Patterns

XY Plane

XZ Plane

YZ Plane

5. Mechanical Drawing (Units: mm)

6. Installation Instructions

Installation Instructions

Barracuda OMB Series

Omni-directional Outdoor Antenna

A Introduction

The Barracuda OMB Antenna is an omnidirectional, fibreglass, outdoor antenna. The UV resistant fibreglass housing enables the OMB antenna to be utilized in all kinds of harsh environments, making it more robust and safer than traditional whip antennas. The omnidirectional antenna's collinear dipole design allows it to radiates uniformly in the azimuth with a high gain, providing coverage over long distances, thus minimizing the number of cells or nodes needed in a network. The antenna has an integrated aluminium bracket to be directly installed on a pole, designed to offer a secure, high wind resistant mount.

B Mounting & Location

To ensure prime performance, the Barracuda OMB series should be mounted in a clean location that is clear from all obstruction so that there is no impact on radiation performance. Also, before installing there must be at least 15mm clearance of all metallic objects around the location. When mounting the bracket on the pole, make sure to keep the bracket level with the top of the pole. The bracket should be mounted on the pole using the following list that are all supplied by Taoglas.

2 M6 U-Bolt 4 Washers 4 M6 Nuts 1 Barracuda Antenna

C Mount Alignment

When mounting the antenna it is important that the top of the aluminium bracket is aligned with the top of the pole. The top of the pole should not exceed the top of the mounting bracket as it will interfere with the antennas performance.

See image for reference of correct mount alignment.

D Installation of the Antenna

Put the two U-Bolts around the pole and through the holes in the aluminium bracket. Making sure that the bracket is correctly positioned level to the top of the pole, place one of the four washers provided, over each of the threaded ends of the U-bolts. Then screw on of the four M6s nuts provide on to each threaded end of the U-bolts and tighten in place.

E Securing the Mount

In order to make sure that the antenna is firmly secured in place on the top of the pole, ensure that the four M6 nuts have been fully tightened. The bracket should not move or shake at all once properly installed.

G Notices

Caution

To comply with FCC RF Exposure requirements in section 1.1310 of the FCC Rules, antennas used with this device must be installed to provide a separation distance of at least 20 cm from all persons to satisfy RF exposure compliance.

Warning

Do not Operate the transmitter when someone is within 20 cm of the antenna.
Do not operate the equipment in an explosive atmosphere.

European Waste Electronic Equipment Directive 2002/96/EC

Please ensure that your old Waste Electricals and Electronics are recycled do not throw them away into standard waste.

Directive 2014/53/EU Radio Equipment Directive (RED)

Harmonised Standards and References:

EN 301 489-1 (V2.2.1): ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements. Referencing CENELEC EN 55032 Class B.

7. Packaging

1 OMB.242.08F21 per tube
 Tube Dimensions - Ø80mm*Height 585mm
 Total Weight - 536.5g

10 tubes per carton
 10 pcs OMB.242.08F21 per carton
 Carton Dimensions - 405*595*185mm
 Weight - 6.22kg

Pallet Dimensions 1200mm*1000mm*1495mm
 28 Cartons per Pallet
 4 Cartons per layer
 7 Layers
