

RP20 pro

High Gain 5G, 4G/LTE 2x2 MIMO Fixed Wireless Access Directional Antenna

The RP20 pro (L000379-XX) antenna family from TE Connectivity (TE) provides high-performance connectivity for current and emerging 4G and 5G frequencies.

The incorporated 2x2 MIMO technology, and consistent radiation patterns means that the RP20 pro can provide enhanced data rates and bandwidth with extremely consistent performance.

There are 2 and 3 antenna port variants available with the 3-port models including GNSS coverage. Each model covers 617 - 6000 MHz and supports all major global 5G/LTE bands.

RP20 pro antennas are suitable for use globally on cellular networks and with any network operator. Connector options are available to fit most common industrial routers/gateways currently on the market.

Designed with a stylish housing and supplied with all necessary mounting hardware, this antenna is intended for professional installations for Fixed Wireless Access applications. They can be mounted to a pole/mast or directly to a wall using the mounting hardware provided.

FEATURES AND BENEFITS

- Global LTE and 5G coverage (617-6000MHz)
- Operates in both CBRS as well as unlicensed 5-6 GHz
- Covers B11 and B32 (1427 - 1522 MHz) to support Japanese customers and various EU countries
- Consistent directional patterns across all bands, providing stable reception
- Integrated pigtail cables - Easier attachment of long-run cables such as LMR240 or LMR400 type low-loss (large dia. cables)
- Supplied with brackets and mounting hardware for pole or wall mounting

APPLICATIONS

- Fixed Wireless Access (FWA)
- Failover support
- Industrial IoT device connections
- Private networks
