Feature

High efficiency
 Low noise
 Complies with SEMI F47
 Harmonic attenuator (Complies with IEC61000-3-2)
 Universal input (85-264VAC)
 Built-in inrush current, overcurrent and overvoltage protection circuits

Safety agency approvals

UL62368-1, C-UL (equivalent to CAN/CSA-C22.2 No.62368-1),

Assembling and Installation Method

Installation method

■ For the metal chassis, keep the distance d1 for isolation between component and metal chassis.

The d1 dimension is the distance required for insulation and does not satisfy cooling conditions. For cooling conditions, please refer to "Derating" and section 3 of the instruction manual.

■ Do not insert a screw more than 6mm from the outside of a power supply to keep enough insulation distance between the screw and internal components.

■ If you use two or more power supplies side by side, please keep a sufficient distance between them to allow enough air ventilation.

■ Ambient temperature around each power supply should not exceed the temperature range shown in "derating".
