

RA2A..C

2-pole solid state relays

Main features

- AC switching solid state relay
- Zero cross switching
- Back to back thyristor output
- Direct copper bonding (DCB) technology
- For resistive AC loads
- Integrated output overvoltage protection
- DC control voltage
- LED for control presence indication for each independent pole
- 6.35 mm Faston termination for the output terminals and 4-pin header for the control terminals

Description

This 2-pole industrial relay minimises the space requirements in a control cabinet without compromising performance. By applying an input voltage on control A, the corresponding output semiconductor is activated at the first zero crossing of line voltage. The same applies to control B.

LEDs indicate the control status of each pole. The optimised design is free of moulding mass to reduce internal mechanical stress.

The integrated varistor across the output of each pole ensures protection against overvoltages.

Specifications are at a surrounding temperature of 25°C unless otherwise specified.

Applications

Plastic injection machines, extrusion machines, blow moulding machines, thermoformers, coffee machines, electrical ovens, fryers, shrink tunnels, reflow ovens.

Main functions

- 2 independent pole switching solid state relay
- Zero cross switching
- Ratings up to 600 VAC, 40 AAC per pole
- 4.5 - 32 VDC control voltage range

 Order code
RA2A ☐ D ☐ C ☐

Enter the code option instead of ☐. Refer to selection guide section for valid part numbers.

Code	Option	Description	Comments
R	-	Solid State Relay (RA)	
A	-		
2	-	2-pole switching	
A	-	Zero cross switching (ZC)	
☐	23	Rated voltage: 24-265 VAC, 650 Vp	
	60	Rated voltage: 42-660 VAC, 1200 Vp	
D	-	Control voltage: 4.5-32 VDC	
☐	25	Rated current: 2 x 25 AAC	
	40	Rated current: 2 x 40 AAC	
C	-	PIN connectors for control	
☐	-		
	H53	RA2A mounted on heatsink RHS38AD	
	S18	Pre-attached thermal pad

Structure

Element	Component	Function
A1, A2	Power connections	Mains and load connections for pole A
B1, B2	Power connections	Mains and load connections for pole B
Control input	Control connection	Terminals for control voltage
Green LED	Control indicator	Indicates presence of control voltage (pole A and pole B)

Features

General data

Material	Noryl, black	
Mounting	Panel mount	
Base plate	Aluminium	
Touch protection	IP00, IP20 when insulated Faston receptacles are used	
Isolation	Output to heatsink	4000 Vrms
	Input to Output	4000 Vrms
Weight	approx. 60 g approx. 210 g (RA2A..H53)	
Control terminals¹	4 PIN connector 0.64 mm square pin with 2.54 mm centre distance	
Power terminals	4 x Fastons; 6.35 x 0.8 mm	
Max. Pull out force for power terminals	130 N	
Relay		
Mounting screws	M5	
Mounting torque	1.5 - 2.0 Nm	

1. Possible mating connector model CE100F22-4-D from MAS-CON

Dimensions

Fig. 2: RA2A..CH53

Dimensions in mm unless otherwise noted.
Tolerances +/- 0.5mm.

Performance

Output specifications

	RA2A...25	RA2A...40
Max. operational current ² : AC-51	2 x 25 AACrms	2 x 40 AACrms
Operational frequency range	45 to 65 Hz	
Leakage current @ rated voltage	< 3 mA	
Output protection	Integrated varistor	
Power factor	≥ 0.95 @ rated voltage	
Minimum operational current	150 mA	250 mA
Non-repetitive surge current (I_{TSM}), t=10 ms	325 Ap	600 Ap
I^2t for fusing (t=10 ms), minimum	525 A ² s	1800 A ² s
Critical dV/dt (@T _j init = 40°C)	1000 V/μs	

2. LC A category with reference to IEC/EN 62314 for the RA2A..40

Output voltage specifications

	RA2A23...	RA2A60...
Operational voltage range, U _e	24 to 265 VACrms	42 to 660 VACrms
Blocking voltage	650 Vp	1200 Vp

Inputs

Control voltage range ³	4.5 - 32 VDC
Pick-up voltage	4.25 VDC
Drop-out voltage	2.0 VDC
Maximum reverse voltage	32 VDC
Response time pick-up @ 50 Hz	≤10 ms
Response time drop-out @ 50 Hz	≤10 ms
Input current per pole @ max. input voltage	≤10 mA

3. DC control to be supplied by class 2 power source

Output power dissipation

Derating Curve for RA2A..H53

Applications

Care must be taken to ensure proper heatsinking when the relay is to be used at high sustained currents. Adequate electrical connection between relay terminals and cable must be ensured.

Thermal characteristics

The thermal design of solid state relays is very important. It is essential that the user makes sure that cooling is adequate and that the maximum junction temperature of the relay is not exceeded.

If the heatsink is placed in a small closed room, control panel or the like, the power dissipation can cause the ambient temperature to rise. The heatsink is to be calculated on the basis of the ambient temperature and the increase in temperature.

Heatsink selection

Note: Add the currents of both poles and compare with datasheets for proper heatsink.

Each pole can handle up to the maximum current specified. Example: Each pole of the RA2A23D40C can handle a maximum of 40 A.

Thermal resistance [°C/W] of RA2A...25

Load current [A]	Surrounding ambient temperature [°C]					
	20	30	40	50	60	70
50	1.11	0.94	0.78	0.62	0.46	0.29

Electromagnetic compatibility (EMC) - Emissions	
Radio interference field emission (radiated)	EN/IEC 55011 Class A: from 30 to 1000 MHz
Radio interference voltage emissions (conducted)	EN/IEC 55011 Class A (Industrial) with external filters: from 0.15 to 30 MHz

- Performance Criteria 1 (PC1): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): During the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.

Environmental specifications

Operating temperature	-20°C to +70°C (-4°F to +158°F)
Storage temperature	-20°C to + 80°C (-4°F to +212°F)
Pollution degree	2 (non-conductive pollution with possibilities of condensation)
EU RoHS compliant	Yes
China RoHS	

The declaration in this section is prepared in compliance with People's Republic of China Electronic Industry Standard SJ/T11364-2014: Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products.

Part Name	Toxic or Harardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Power Unit Assembly	x	O	O	O	O	O

O: Indicates that said hazardous substance contained in homogeneous materials for this part are below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

这份申明根据中华人民共和国电子工业标准
SJ/T11364-2014：标注在电子电气产品中限定使用的有害物质

零件名称	有毒或有害物质与元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴化联苯 (PBB)	多溴联苯醚 (PBDE)
功率单元	x	O	O	O	O	O

O:此零件所有材料中含有的该有害物低于GB/T 26572的限定。

X: 此零件某种材料中含有的该有害物高于GB/T 26572的限定。

Short circuit protection

Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state. In type 2 coordination the device under test will still be functional after the short circuit. In both cases, however, the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors of terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 65,000A rms Symmetrical Amperes, 600Volts maximum when protected by fuses. Tests at 65,000A were performed with Class J, fast acting: please refer to the table below for maximum allowed ampere rating of the fuse. Use fuses only.

Protection co-ordination Type 1 according to UL 508				
Part No.	Prospective short circuit current [kArms]	Max fuse size [A]	Class	Voltage [VAC]
RA2A..25..	65	30	J / CC	Max. 600
RA2A..40..		40 20	J HSJ20 (Mersen)	

Protection co-ordination Type 2 (IEC/EN 60947-4-3)				
Part No.	Prospective short circuit current [kArms]	Ferraz Shawmut (Mersen)		Voltage [VAC]
		Max fuse size [A]	Part number	
RA2A..25..	10	25	6.9 gRC 10 - 25	Max. 600
RA2A..40..		40	6.9xx CP gRC 14x51/40	

xx= 00 without fuse trip indication

xx = 21 with fuse trip indication

Protection co-ordination Type 2 with Miniature Circuit Breakers (M.C.B.s)				
Solid State Relay type	ABB Model no. for Z - type M. C. B. (rated current)	ABB Model no. for B - type M. C. B. (rated current)	Wire cross sectional area [mm ²]	Minimum length of Cu wire conductor [m] ⁵
RA2A..25 (525 A ² s)	1-pole S201 - Z4 (4A) S201 - Z6 UC (6A)	S201 - B2 (2A) S201 - B2 (2A)	1.0	21.0
			1.0	21.0
			1.5	31.5
RA2A..40 (1800 A ² s)	1-pole S201 - Z10 (10A)	S201 - B4 (4 A)	1.0	7.6
			1.5	11.4
			2.5	19.0
