

POTTER & BRUMFIELD SOCKETS & ACCESSORIES, KUP RELAYS

GENERAL PURPOSE ACCESSORIES

INTRODUCTION

Relay accessories are devices to support the design and maintenance of relays in electrical circuits. This relay series include clips, mounting adapters and sockets. Mounting adapters provide adaptation between standard socket types. Sockets are used for relay mounting in configurations, including panel mount, PCB types and DIN rail and clips are used to secure the relay in the connector.

FEATURES

- Sockets for 1 - 3 pole relays with .187" (4/75mm) quick connects

Caution:

Printed circuit sockets are manufactured with "floating" (Loose) terminals. This permits them to align with holes in the circuit board and with the relay terminals. During the mounting and soldering of the socket, vertical float should be eliminated and the terminals seated on the board. (This may be accomplished by inserting a dummy relay in the socket.) Failure to eliminate float may cause fracture of the solder joint or separation of the copper conductor from the printed circuit board when a relay is inserted in the socket after soldering.

Potter & Brumfield Sockets & Accessories, KUP Relays

Screw terminal socket for relays through 3 poles 27E121

Offers screw termination for KUEP, KUL, KUMP and KUP relays, through 3 poles, with .187" (4.75mm) quick connect terminals. This socket stacks on 1.700" (43.18mm) centers. When surface mounting, two #6-32 screws of suitable length are required. When track mounting, two 24A071 retainer clips (not shown) are required.

Screw terminal, DIN rail, snap-mount socket 27E893

Offers screw termination for KUEP, KUL, KUMP and KUP relays, through 3 poles, with .187" (4.75mm) quick connect terminals. This socket is constructed with a spring-loaded latch which allows it to be quickly snapped onto or removed from a DIN or "top hat" style mounting track. No special tools or extra hardware is required for installation.
