Description

A family of inductive proximity switches in industrial standard nickel-plated brass housings. They are characterized by extremely high performance in a very small design, to satisfy the most demanding applications, also where the space available for the sensor is limited and extended sensing range is requested.

Output is open collector NPN or PNP transistors.

Sensing

Detection

Assured operating sensing distance (S_a)	$0 \leq S_a \leq 0.81 \times S_n$
Effective operating distance (S_r)	$0.9 \times S_n \leq S_r \leq 1.1 \times S_n$
Usable operating distance (S_u)	$0.9 \times S_r \leq S_u \leq 1.1 \times S_r$
Differential travel (H) (Hysteresis)	1 to 20% of sensing dist.

Correction factors

The specific operating distance S_n refers to defined measuring conditions. The following data have to be considered as general guidelines.
