MISSILE COMMAND SPECIFICATION

CIRCUIT BREAKER, MAGNETIC, LOW-POWER,
SEALED, TRIP-FREE, THREE POLE

The complete requirements for procuring the item described herein shall consist of this document and the issue in effect of MIL-C-39019 and MIL-C-39019/5.

Description. Circuit breaker, Magnetic, Low-Power, Sealed, Trip-Free, Three Pole.

Configuration and dimensions. See Figure 1.

Terminals. Circuit breakers shall be supplied with screw terminals located as shown in Figure 1. Screw thread shall be .138-32 UNC-2A and each screw shall be supplied with an internal tooth lockwasher captivated to the screw.

Terminal strength. Terminals shall withstand a minimum of 7.0 inch-pounds of torque applied to the screw head without distortion of or damage to the terminals.

Terminal lugs. Each screw terminal shall be capable of accepting two MS1743-13, -14 or -15 terminal lugs.

Requirements. Except as otherwise specified herein, electrical and mechanical requirements for each circuit breaker shall be identical to the corresponding M39019/05 dash number referenced in Table I.

Qualification inspection. Qualification inspection in accordance with (IAM) MIL-C-39019 shall not be required unless specified in the contract or purchase order.

Quality conformance inspection. Quality conformance inspection shall consist of Group A inspection IAM MIL-C-39019. Group B inspection IAM MIL-C-39019 shall not be required unless specified in the contract or purchase order.

Marking. Identify IAM MIL-STD-130. Part number shall consist of this MIS and the applicable Dash Number IAM Table I.

Part number. See Table I.

Suggested source of supply.

Airpax Electronics
Cambridge Division
CAGE Code 81541
Cambridge, MD 21613
Manufacturer Part No. See Table I

Source information is for the convenience of the procuring activity. It is not to be construed as restricting qualified sources of procurement.

Last page identification. The last page of this specification is identified by an asterisk (*) immediately to the right of the last page number.
