

Installing the Side Mount Brackets

The following installation guide describes how to mount the EZLSA-MBK-16 side-mount brackets. Refer to the EZ-SCREEN LS installation manual (p/n 179480) for complete mounting, alignment, and installation instructions, including dimensional information.

- 1 Adjust clamp screw to loosen or tighten clamp.

- 2 Slide inner bracket assembly into outer bracket groove.

(Depending on your configuration, it may be helpful to mount the outer bracket to the mount surface first before Step 2 process)

- 3 With the light screen aligned, tighten rotation position screw to complete installation.
